Hinge Pin (4X)

M8 x 45MM (1X)

SHELVING ASSEMBLY SEQUENCE

- 0** For shelving requiring three supports: Remove the upper and lower latches from the middle support as shown.

For the remainder of the manual unless otherwise noted, the instructions will apply to all supports.

NOTE: For truck bodies that have an E Track or other equipment installed onto the interior walls, a spacer will need to be created in order to align the uprights and shelving correctly.

- 1** Install a Retain Ring on one side of each Hinge Pin (4 total per Upright).

- 2** Install a Hinge Pin and Retain Ring in the holes shown below.

- 3** Attach upper Shelving to the supports as shown.

- 4** Install Hinge Pin and Retain Ring as shown.

- 5** Repeat Steps 3 and 4 to install the lower Shelf.

- 6** Attach to vehicle wall as shown below.

- 7** Upright feet are customizable for drilling locations and positioning. Install hardware according to your vehicle OEM.

- 8** The Shelving Lock is engaged when shelving is open, to disengage and close Shelving, slide lock in and up as shown.

Refer to your Cantilever Shelving Mounting Assembly Manual to mount shelving to your vehicle.
