TOOL LIST AND PLUS NUT APPLICATION

INSTALLER NOTE: ALWAYS check for clearance on the the vehicle before drilling any holes for the installation of any equipment. Look for any obstructions such as fuel tanks, fuel lines, brake lines, or electrical wiring and components. If any floor drill point is less than 2" from a fuel system component you should move it to another location or reverse the fastener so that the head is under the floor. Always drill with caution and use drill stops. Wear eye protection when drilling.

- · Adjustable wrench
- · Phillips screwdriver
- 11/32", 1/16", 1/8", and 1/2" sockets or wrenches
- Small mallet
- Hammer
- Center Punch
- 1" Hole Saw (For RAM ProMaster only)

TOOLS NEEDED:

- · Safety glasses
- · Windex/Spray Lubricant
- · Battery or air drill & driver
- Metal Shears

HOW TO SET A PLUSNUT WITH THE PROVIDED PLUSNUT TOOL

- Lay out the holes with a marker where each Plusnut is to go and then drill the proper size hole in the sheet metal (½" diameter for this application).
- When you have a situation where placing a nut on a bolt is impossible, use the Plusnut blind fasteners. This blind fastening method is illustrated below with the optional Plusnut Tool.
- Make sure each Plusnut is set properly before installing the equipment.

Assemble the Plusnut.

Plusnut Tool, Flat Washer

and 1.75" Hex Head Bolt and

insert into 1/2" hole as shown.

- Insert the Plusnut into the hole and set it using the Plusnut Tool, a Flat Washer, and a 1.75" Hex Head Bolt. The bolt is used only to pull the backing of the Plusnut against the inaccessible side of the sheet metal.
- Remove the 1.75" Bolt and the Plusnut Tool. The Plusnut is ready to be used

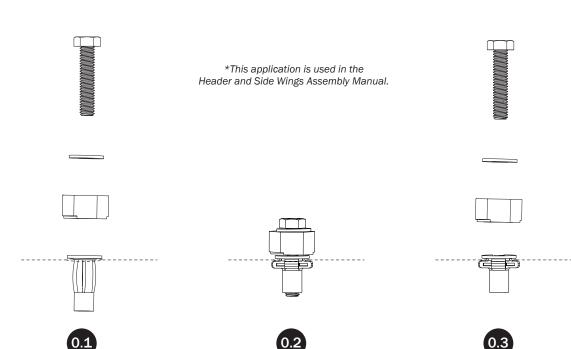

Remove the Bolt. Flat Washer.

and Plusnut Tool. Install Fastening

Hardware according to your

Assembly Instruction sequence.

 If neither nut and bolt nor Plusnut fastening are possible, use sheet metal screws as a last resort.

Use \%" open end wrench to

hold the Plusnut Tool and with

½" wrench, tighten the Bolt until

the Plusnut fattener collapses.

Do not overtighten.

UNIVERSAL SLIDING DOOR ASSEMBLY SEQUENCE

NOTE: Assembly Instructions are shown with the ProMaster Header and Side Wing configuration for Illustrative purposes only.
